Preface

The *Fiscal Reference Tables* provide annual data on the financial position of the federal and provincial governments. The data are presented on both a public accounts basis – corresponding to the accounting conventions used to report financial information to the respective legislatures – as well as on a national accounts basis – as prepared by Statistics Canada and the Organisation for Economic Co-operation and Development (OECD).

For information or clarification, please contact Peter DeVries at (613) 996-7397, Fiscal Policy Division, Department of Finance, Ottawa, Ontario, K1A 0G5.

For inquiries about computerization and database management, please call Richard Hotte at (613) 992-6720.

[1] The OECD data overstate Canadian government receipts relative to those of other countries because Canadian government revenues from the sale of goods and services are classified as receipts, whereas such revenues are netted off of outlays in the data for other countries. On a comparable basis, Canadian government receipts relative to GDP would be about 3 percentage points lower than shown in the table.

[1] The OECD data overstate Canadian government receipts relative to those of other countries because Canadian government revenues from the sale of goods and services are classified as receipts, whereas such revenues are netted off of outlays in the data for other countries. On a comparable basis, Canadian government receipts relative to GDP would be about 3 percentage points lower than shown in the table.

[1] Includes non-autonomous government employee pension plan liabilities, which amounted to around 19 per cent of GDP in 1999. This overstates the Canadian debt position relative to countries that have large unfunded liabilities for such pensions, which are not included in the national accounts measure of government debt. Among the G-7 countries, only the United States' debt data are comparable with those of Canada.
